

WORKSHOP

A.UG. (Airborne Underwater Geophysical Signals) Remote Monitoring System

[2 DAYS INSTRUCTION]

COURSE OVERVIEW

Advanced remote monitoring in drinking water distribution networks is a must-have add-on to avoid future waterborne contamination and subsequent illness. Increased insight into any community's current water quality can result in quicker decision-making capabilities when anomalies present themselves, detecting issues before they become problems - minimizing health impacts and damage to infrastructure.

COURSE OUTLINE

🔵 Overview of the Triton Intelligent Water Surveillance system. 🔵 Safety precautions. 🔵 System overview. 🔵 Installation. 🔵 Operation. 🔵 Calibration. 🔵 Maintenance. 🔵 Troubleshooting. 🔵 Technical support. 🔵 O&M videos: introduction and maintenance of the Triton online monitoring system. 🔵 Appendices.

TARGET AUDIENCE

On-the-job training for personnel.
