Backflow Prevention and Cross-Connection Control

[2 DAYS INSTRUCTION]

COURSE OVERVIEW

Backflow prevention and cross-connection control provides guidance to water operators on the recommended procedures and practices for operating a cross-connection control program. The purpose of any such program is to reduce the risk of contamination or pollution of the public water system. A cross-connection is an actual or potential connection between any part of a potable water system and any other environment that contains other substances that, under any circumstances, would allow such substances to enter the potable water system.

COURSE OUTLINE

🔵 Introduction 🔵 Program Administration 🔵 Backflow Principles 🔵 Backflow Prevention Assembly Application, Installation, and Maintenance 🔵 Typical Hazards 🔵 Appendices.

PREREQUISITE

Open.

TARGET AUDIENCE

Water and wastewater utility field staff.
