

# WORKSHOP

## Hydrant & Valve Operation & Maintenance

[ 2 DAYS INSTRUCTION ]

### COURSE OVERVIEW

This one-day workshop, presented by DonWebb, will provide attendees with comprehensive information and skills training on the proper operation and maintenance of hydrants and valves, including: proper valve box installation, AWWA gate valve & butterfly valve design and O&M, AWWA fire hydrant Design and O&M, and guidelines to creating proper maintenance programs. The afternoon field session will include dismantling and repair of various hydrants.

Don has been with Mueller Canada for 38 years and is responsible for sales in Saskatchewan, Manitoba, and Northwestern Ontario. He has won numerous awards from SPWA, MWWA, WCWWA and the NWOWWA while working in the waterworks industry with Mueller.

(Attendees are asked to dress for outdoor active work.)

### COURSE OUTLINE

- Proper valve box installation.
- AWWA gate valve design, operation and maintenance.
- AWWA butterfly valves design, operation and maintenance.
- AWWA fire hydrant design, operation and maintenance.
- Establishing a proper maintenance program.
- Field operations will require operator participation on various hydrants used within the community. Each hydrant will be torn down, repair and tested.
