

CEUs - CONTINUING EDUCATION UNITS

Processes for Water Treatment

COURSE OVERVIEW

Wherever water treatment takes place, a diverse range of technologies is used to purify drinking water. Treatment technologies are selected and applied using several determining factors including water source, type of contaminant, and cost.

COURSE OUTLINE

- Coagulation and Flocculation
- Filtration systems
- Membrane Processes
- Chemical Disinfection / Oxidants
- Adsorption and Ion Exchange Systems
- Air Stripping Systems
- Overview and Water Sources
- Tech Briefs

PREREQUISITE

Open.

TARGET AUDIENCE

Water utility field staff, water and wastewater operators..
