Backflow Prevention and Cross-Connection Control

COURSE OVERVIEW

Backflow prevention and cross-connection control provides guidance to water operators on the recommended procedures and practices for operating a cross-connection control program. The purpose of any such program is to reduce the risk of contamination or pollution of the public water system. A cross-connection is an actual or potential connection between any part of a potable water system and any other environment that contains other substances that, under any circumstances, would allow such substances to enter the potable water system.

COURSE OUTLINE

📍 Introduction 📍 Program Administration 📍 Backflow Principles 📍 Backflow Prevention Assembly Application, Installation, and Maintenance 📍 Typical Hazards 📍 Appendices.

PREREQUISITE

Open.

TARGET AUDIENCE

Water and wastewater utility field staff.
