Transportation of Dangerous Goods

[ONLINE COURSE OR 1/2 DAY INSTRUCTION]

COURSE OVERVIEW

Thousands of shipments of dangerous goods such as gasoline, propane and pesticides are transported every day on Canada's highways. The Transportation of Dangerous Goods (TDG) Regulations are intended to protect the public from hazards of an accidental spill or leak.

The TDG system provides information to everyone who comes in contact with the dangerous goods - including emergency responders, if something goes wrong.

The regulations make sure that:

a shipping document describes the dangerous goods

safe packaging helps prevent spills and leaks

safety marks such as labels and placards provide visual clues about the hazards of the dangerous goods

emergency actions protect people and the environment in case of a spill or leak.

COURSE OUTLINE

• Introduction • Classification (UN Numbers, Dangerous Goods List) • Shipping Document • Safety Marks (containers, labels, Dangerous Goods Placards) • Containers • Special Situations • Emergency Actions • Glossary • Quizzes • Final test.

TARGET AUDIENCE

Water utility field staff, forepersons, supervisors, managers, contractors, water utility construction inspectors, and fire department personnel.
